

# **VaxVoIP SIP RECORDING SDK**

## **SIP CALL RECORDING FLOW**

**VERSION 8.0.2.4**

## **SIP REC CALL FLOW**

|  |
|--|
| SIP REC client sends a call request.                                   |
| <b>Event:</b> OnCallSessionCreated()                                   |
| <b>Event:</b> OnIncomingCall()   |
| <b>Method:</b> AcceptCallSession()                                     |
| <b>Event:</b> OnCallSessionConnected()                                 |
| <b>Method:</b> RecordWaveStartToCallSession()                          |
| Voice streaming starts between SIP REC client and VaxVoIP SIP REC SDK. |
| Voice recording starts storing in a wave file.                         |
| <b>Event:</b> OnCallSessionHangUp()                                    |
| <b>Event:</b> OnCallSessionClosed()                                    |
